

Truck Committee Meeting Minutes
June 27, 2012
1900 hours
Company One

Attendance: Dave Bourgoïn, Eric Epstein (Gowans-Knight), Tim O'Neil, Tom Kline. Mike Moran

Called to order: 1905

- Did intro's
- Reviewed why Avon is looking for new engine(s)
- Looking for creative way to solve our problem of replacing apparatus.
- Offered to have Spartan rep come out to look at Cab/chassis.
- GK feels our requirements are doable.
- GK only does Stainless on everything except the chassis.
- Mike Moran suggested 500 HP motor
- All LED lighting multiplexing
- Currently working on a heavy rescue with a small pump for Pound Ridge, NY. Can take a look while it's still @ GK
- Hose cover. 90% is canvas. Concern with hard cover in that coupling could get caught and stop the laying of hose.
- Light tower. Had issues with Command lights, but no issue with Wilbert.
- Pump – single stage or two stage? Indicated single stage at this point.
- State statute requires a 2-year warranty minimum for apparatus.
- Why GK. CT company all built in state, attention to detail, customer builder, Spartan/Hale certified warranty/service center. Build 5 or 6 trucks a year. Good working relationship with town. Parts are not proprietary so can be bought from other manufacturers.

Meeting adjourned: 2043
