

Truck Committee Meeting Minutes  
July 16, 2013  
1800 hours  
Company One

Attendance: Dave Bourgoïn, Tim O'Neil, Bruce Appell, Mike Levesque(Rosenbauer), Tom Kline

Called to order: 1830

Purpose is to review drawing with Rosenbauer rep.

- Reviewed Chassis specs. Notes made on spec sheet
- Questions about headsets. Seat back, or regular headset.
- Will try to get the shortest possible front bumper with trash line and Q, no less than 12".
- Take a picture of box on Engine 10's map book box
- Provide radio specs to Rosenbauer so they can purchase and install
- Add RICS box
- Check to see if lights can be green instead of red (Mike @ Rosenbauer)
- Chevrons done at factory, striping and lettering to be done @ Greenwood
- Do not use same A/C systems as on 14 or 10.
- Mike Moran to supply specs for gear ratios for transmission
- Transmission Mode Programming TBD - Mike Moran decision
- Mike Moran - provide fuel management system to manufacturer
- Mike Moran - confirm tire choice, currently Michelin
- Set of standard roller chains supplied by manufacturer.
- Reviewed body specs. Notes made on spec sheet
- Go with Bronze impeller in pump to allow pump to stay wet.
- Dept. will supply equipment for MDT and antenna
- American flag on grill
- Mike Moran - what type of tire pressure monitoring system?
- Need loose equipment list to be included in purchase of truck.
- 200' 2" and 200' 2 1/2" on top that will come off drivers side. 200' 2" and 300' 2" on bottom will come off officer's side.
- Check on 1500 GPM monitor. May require 4" plumbing instead of 3"
- Foam system. If go bigger than 2002, moving to industrial system that will deliver a rich solution at low flow (one line). Would not be able to get .5%, would be higher rate of foam. Concerns about plumbing for every discharge. Mike (Rosenbauer) stated he never saw a truck with all discharged plumbed. Will do more research to see how we can have every discharge plumbed for foam. Also going to check on EZ Foam system by Rosenbauer.
- Provide discharge color coding to Rosenbauer
- Add EZ Steps to compartments
- Add chrome to bottoms of doors to match EZ Steps
- Review location of circuit breaker box.
- Three horizontal trays (two tilt down) in Right front compartment 500lb capacity. If jacks fit in coffin compartment, horizontal trays are ok.

- Two coffin compartments (not in spec) size TBD.
- Right Rear compartment layout TBD
- Check to see if ladder rack can be moved up to increase compartment size without raising the height of the truck.
- Provide model number of strainer
- Decide if circuit breaker box is in right or left front compartment
- Roof mounted decal truck designation
- Mike Moran, what type of battery charger? Comes with Newmar 40A charger at no charge with Green Star system

Meeting adjourned: 2245
