

Truck Committee Meeting Minutes
August 29, 2012
1900 hours
Company One

Attendance: Dave Bourgoïn, Tim O'Neill, Bruce Appell, Tom Kline, Michael Trick

Called to order: 1905

- We have two designs from Rosenbauer. One with a rear mount pump and one with a center mount pump. We want the center mount pump.
- Cord reel must be 200' of 10/4, not 12/4 one on each side of the truck if generator is capable of handling full load of both
- Every discharge must be able to flow foam.
- Shorten front bumper to 12 inches.
- Both designs are too high at this point.
- Rear mount concerned with taking water in on left/right.
- Look at merits of going 10,000 PSI system for Hurst Tool, or, do we stay with 5,000 PSI?
- Front bumper size reduced by 6 – 12 inches still have a 100' line in a compartment
- Move to Blitzfire (from TFT) type of blitz attack instead of portable stinger.
- Autoprime system
- Tank level monitor should be on three sides of apparatus
- For the reels, manufacturer other than Haney that makes a smaller/more durable reel.
- Must have receivers for hitches on front bumper, regardless of size.

Meeting adjourned: 2100
